

# Joshua P. French

Department of Mathematical & Statistical Sciences  
University of Colorado Denver  
Campus Box 170  
P.O. Box 173364  
Denver, CO 80217-3364

Email: [joshua.french@ucdenver.edu](mailto:joshua.french@ucdenver.edu)  
Fax: 303-315-1704  
<https://math.ucdenver.edu/~jfrench/>  
YouTube: <https://www.youtube.com/@jfrench>

## Research Interests

---

Spatial statistics, exceedance set identification, extreme value theory, environmental and ecological applications, public health.

## Education

---

2009	Ph.D.	Statistics	Colorado State University, Fort Collins
2005	M.S.	Statistics	Colorado State University, Fort Collins
2003	B.A.	Mathematics	Point Loma Nazarene University

## Professional Experience

---

2018–present	Associate Professor, Department of Mathematical and Statistical Sciences, University of Colorado Denver
2010–2014	Visiting Scientist, National Center for Atmospheric Research, Boulder, CO
2009–2018	Assistant Professor, Department of Mathematical and Statistical Sciences, University of Colorado Denver
2003–2009	Teaching/Research Assistant, Department of Statistics, Colorado State University, Fort Collins

## Publications

---

### Refereed Publications

**French, Joshua P.**, Hall, Lauren M., Meysami, Mohammad, Weaver, Nicholas, Nguyen, Minh; Panter, Lee. (2022) A comparison of spatial scan methods for cluster detection. *Journal of Statistical Computation and Simulation*. 92(16):3343–3372. <https://doi.org/10.1080/00949655.2022.2065676>.

## Presentations at Meetings and Seminars

---

### Invited Presentations

June 4, 2022. Environmental Risks for Nontuberculous Mycobacterial Lung Infections Symposium, Fort Collins, CO. Panelist for *Statistical and analytic challenges in estimating NTM risk*.

June 4, 2022. Environmental Risks for Nontuberculous Mycobacterial Lung Infections Symposium, Fort Collins, CO. *Spatial scan methods for disease cluster detection*.

September 14, 2016. Health Impacts from Climate Change, Aspen Global Change Institute, Aspen, CO. *Spatio-temporal Statistical Methods for Quickly Detecting Disease Outbreaks*.

May 5, 2016. Workshop on Dependence, Stability, and Extremes, Toronto, Canada. *Confidence Regions for Exceedance Sets of Large Geostatistical Data Sets*.

November 20, 2015. AMS Departmental Colloquium, Colorado School of Mines, Golden, CO. *Confidence Regions for Exceedance Sets of Large Geostatistical Data Sets*.

September 23, 2015. Group Meeting/NTM Genomics Meeting, National Jewish Health, Denver, CO. *Confidence Regions for Exceedance Sets of Geostatistical Data.*

November 21, 2014. Department of Statistics, University of Michigan, Ann Arbor, MI. *Credible Regions for Exceedance Sets of Geostatistical Data.*

August 6, 2014. Joint Statistical Meetings, Boston, CO. *Detecting Exceedance Regions for Spatial and Spatio-Temporal Data.*

May 7, 2014. Research Seminar, Department of Biostatistics, University of Colorado Denver (Anschutz Medical Campus), Aurora, CO. *Confidently Identifying Exceedance Regions for Spatial Data.*

December 4, 2013. Faculty Colloquium, University of Colorado Denver, Denver, CO. *Confidently Identifying Exceedance Regions for Spatial Data.*

March 12, 2013. Department of Statistics and Probability Colloquium, Michigan State University, East Lansing, MI. *Spatio-Temporal Exceedance Locations and Confidence Regions.*

June 19, 2012. WNAR-Graybill 2012 Conference, Fort Collins, CO. *Spatial Inference for Climate Change.*

April 17, 2012. Denver R Users Group, Denver, CO. *Bayesian Data Analysis in R.*

April 9, 2012. Data Assimilation Seminar, University of Colorado Denver, Denver, CO. *Spatio-Temporal Exceedance Locations and Confidence Regions.*

June 14, 2011. Research Colloquium, North American Regional Climate Assessment Program (NARCCAP), Boulder, CO. *Spatio-Temporal Exceedance Locations and Confidence Regions.*

November 13, 2009. Fall Meeting, Colorado-Wyoming Chapter of the American Statistical Association, Aurora, CO. *Extremes of Gaussian Random Fields.*

February 17, 2009. University of Northern Colorado, Greeley, CO. *Constructing Confidence Regions for Level Curves.*

February 12, 2009. Statistical and Applied Mathematical Sciences Institute, Research Triangle Park, NC. *Constructing Confidence Regions for Level Curves.*

February 9, 2009. University of Colorado Denver, Denver, CO. *Constructing Confidence Regions for Level Curves.*

February 3, 2009. Arizona State University, Tempe, AZ. *Constructing Confidence Regions for Level Curves.*

## Contributed Presentations

August 9, 2022. Joint Statistical Meetings, Washington, D.C. *A Sandwich Smoother for Spatio-Temporal Functional Data.*

August 9, 2021. Joint Statistical Meetings (Virtual). *A Semiparametric Approach for Prediction with Large Geostatistical Data Sets.*

November 19, 2020. International Verification Methods Workshop Online. *Nonparametric Permutation Procedures for Evaluating Climate Model Accuracy*.

August 6, 2020. Joint Statistical Meetings (Virtual). *A Nonparametric Bootstrap Approach for Evaluating Climate Model Accuracy*.

July 28, 2019. Joint Statistical Meetings, Denver, CO. *A Sandwich Smoother for Spatio-Temporal Arrays and Time Series*.

July 11, 2019. Spatial Statistics 2019, Sitges, Spain. *A sandwich smoother for spatio-temporal functional data*.

June 25, 2019. Western North American Region of the International Biometric Society, Portland, OR. *Detecting emerging disease clusters with the cumulative sum of scan statistics*.

October 2, 2018. 4th Conference on Stochastic Weather Generators, Boulder, CO. *A sandwich smoother for spatio-temporal arrays and time series*.

July 31, 2018. Joint Statistical Meetings, Vancouver, BC. *Statistical Identification of Climate Hotspots*.

July 31, 2017. Joint Statistical Meetings, Baltimore, MD. *Assessing NARCCAP Climate Model Effects Using Spatial Confidence Regions*.

July 31, 2016. Joint Statistical Meetings, Chicago, IL. *Quantifying waves of extreme weather*.

August 11, 2015. Joint Statistical Meetings, Seattle, WA. *Confidence Regions for the Contour Lines of Spatial Data*.

June 10, 2013. The International Environmetrics Society, 2013, Anchorage, AK. *Confidently Identifying Exceedance Regions for Spatial Data*.

June 6, 2013. Spatial Statistics 2013, Columbus, OH. *Hotspot identification for massive spatial data sets*.

February 13, 2013. SAMSI/NCAR Workshop on Massive Datasets in Environment and Climate, Boulder, CO. *Identifying Hotspots for Massive Spatial Data Sets*. (poster)

November 2, 2012. Fall Meeting, Colorado-Wyoming Chapter of the American Statistical Association, Aurora, CO. *Hotspot Identification for Massive Spatial Data Sets*.

August 1, 2012. Joint Statistical Meetings, San Diego, CA. *Hotspot Identification for Massive Spatial Data Sets*.

April 4, 2012. SIAM Conference on Uncertainty Quantification, Raleigh, NC. *Uncertainty and Differences in Global Climate Models*.

December 6, 2011. American Geophysical Union Fall 2011 Meeting, San Francisco, CA. *Assessing Climate Change and Comparing Climate Models Through Exceedance Regions* (poster).

August 3, 2011. Joint Statistical Meetings, Miami Beach, FL. *Spatio-Temporal Exceedance Locations and Confidence Regions* (topic-contributed).

October 15, 2010. Workshop on Environmetrics, National Center for Atmospheric Research, Boulder, CO. *Constructing Confidence Regions for Exceedance Locations of Spatio-Temporal Data* (poster).

June 25, 2009. Graybill VIII: 6th International Conference on Extreme Value Analysis, Fort Collins, CO. *Confidence Regions for Level Curves*.

June 12-16, 2007. Graybill Conference VI: Symposium on Applied Probability and Time Series in honour of Peter J. Brockwell, Fort Collins, CO. *Spatial Uncertainty in the Contour Lines of a Spatial Process* (poster).

September 7-9, 2005. Conference on Statistics for Aquatic Resources Monitoring, Modeling, and Management, Joint Program for DAMARS and STARMAP, Oregon State University, Corvallis, OR. *Review of Geostatistics in Aquatic Systems* (poster).

April 22, 2005. Spring Meeting, Colorado-Wyoming Chapter of the American Statistical Association, Boulder, CO. *Exploring Spatial Correlation in Rivers*.

March 8, 2003. Southern California MAA Meeting, Harvey Mudd College, Claremont, CA. *The Study of Freshman Attrition Rates of Point Loma Nazarene University* (poster).

## Media

Job Market Trends For Recent Grads, October 5th, 2020.

<https://www.zippia.com/data-scientist-jobs/trends/>

## Honors

---

Boes Award for Excellence in Teaching, Department of Statistics, Colorado State University, May 2009

Best Student Presentation, Colorado-Wyoming ASA meeting, April 2005

Outstanding Senior Award for the Mathematics/Computer Science Department, Point Loma Nazarene University, 2003

## Software

---

**SpatialTools**. An R package available through the Comprehensive R Archive Network (CRAN). Tools for spatial data analysis. Emphasis on kriging. Provides functions for prediction and simulation. Intended to be relatively straightforward, fast, and flexible. Uses C++ to increase speed of analysis.

**ExceedanceTools**. An R package available through the Comprehensive R Archive Network (CRAN). Tools for constructing confidence regions for exceedance sets and contour lines.

**smacpod**. An R package available through the Comprehensive R Archive Network (CRAN). Statistical Methods for the Analysis of Case-Control Point Data. Various statistical methods for analyzing case-control point data.

[smerc](#). An R package available through the Comprehensive R Archive Network (CRAN). Statistical Methods for Regional Counts. Provides statistical methods for the analysis of areal data, with a focus on cluster detection.

[gear](#). An R package available through the Comprehensive R Archive Network (CRAN). Geostatistical Analysis in R. Implements common geostatistical methods in a clean, straightforward, efficient manner.

[autoimage](#). An R package available through the Comprehensive R Archive Network (CRAN). Multiple Heat Maps for Projected Coordinates. Functions for displaying multiple images with a color scale, i.e., heat maps, possibly with projected coordinates. The package relies on the base graphics system, so graphics are rendered rapidly.

[cope](#). An R package available through the Comprehensive R Archive Network (CRAN). Coverage Probability Excursion (CoPE) Sets. Provides functions to compute and plot Coverage Probability Excursion (CoPE) sets for real valued functions on a 2-dimensional domain. CoPE sets are obtained from repeated noisy observations of the function on the entire domain. They are designed to bound the excursion set of the target function at a given level from above and below with a predefined probability. The target function can be a parameter in spatially-indexed linear regression. Support by NIH grant R01 CA157528 is gratefully acknowledged.

[hero](#). An R package available through the Comprehensive R Archive Network (CRAN). An implementation of the sandwich smoother proposed in Fast Bivariate Penalized Splines by Xiao et al. (2012) <doi:10.1111/rssb.12007>. A hero is a specific type of sandwich. [Dictionary.com](#) (2018) describes a hero as: a large sandwich, usually consisting of a small loaf of bread or long roll cut in half lengthwise and containing a variety of ingredients, as meat, cheese, lettuce, and tomatoes.

[api2lm](#). An R package available through the Comprehensive R Archive Network (CRAN). Simplifies aspects of linear regression analysis, particularly simultaneous inference. Additionally, supports *A Progressive Introduction to Linear Models* by Joshua French.

## Professional Organizations

American Statistical Association, Colorado-Wyoming Chapter, Statistics and the Environment Section

## Grants

---

### Grant Support/Funded Grants

6/1/05-7/31/05, STARMAP: Applying Spatial and Temporal Modeling of Statistical Surveys to Aquatic Resources, Environmental Protection Agency (STAR-Program), R829095. Two months summer support. (N.S. Urquhart and R.A. Davis, Co-PIs)

6/1/10-6/30/11, Collaborative Research: The North American Regional Climate Change Assessment Program (NARCCAP)–Using Multiple GCMs and RCMs to Simulate Future Climates and Their Uncertainty, National Science Foundation, ATM-0534173. Two months summer support. (S. Sain, PI)

5/4/12-5/3/13, Recorded Online Lectures to Improve Student Experiences in Math Classes, CU Denver CLAS ACT Grant 2012-2013. \$5,000. (Joshua French and Diana White, Co-PIs)

4/13, CU Denver CLAS Dissemination Grant, Spring 2013. \$475.

11/13, CU Denver CLAS Dissemination Grant, Fall 2013. \$1,000.

6/14-5/15, An Integrated Learning Approach for Interdisciplinary Training in Spatial Statistics, CU Denver CLAS ACT Grant 2014-2015. \$5,000. PI: Joshua French.

6/14, Improved Multiscale Prediction for Large Spatial Data Sets, CU Denver CRISPS Grant 2014-2015. \$7,000. PI: Joshua French.

4/1/15-3/31/2018, Multiple Testing Methods for Random Fields and High-Dimensional Dependent Data, National Institute of Health, R01 CA157528. Approximately three months summer support. PI: Armin Swartzman.

8/1/15-7/31/19, FRG: Collaborative Research: Extreme value theory for spatially indexed functional data, National Science Foundation, DMS - STATISTICS 1463642. Co-PIs: Piotr Kokoszka, Joshua French, Stilian Stoev, and Mark M. Meerschaert. \$874,886. My portion: \$129,326.

8/1/19-7/31/22, Collaborative Research: Spectral functional principal components on Abelian groups with applications to spatial functional data, National Science Foundation, DMS-STATISTICS. Co-PIs: Piotr Kokoszka, Joshua French. \$200,000. My portion: \$80,000.

6/1/2021-9/30/2022. Nontuberculous Mycobacterial Disease- ecologic risk modelling. NIH NIAID subcontract 75N93021P00818. PI: Joshua French. \$24,046.

6/1/2022-5/31/2024. OER for the Creation of Interactive Computational Notebooks and a Computational Pathway in Mathematics and Statistics. Troy Butler, Joshua French, Adam Spiegler, Stephen Hartke, Yaning Liu, Gary Olson. \$96,121.
